TRAIL I.D. _____	

The signs are printed black on white polyvinyl material that is both strong and pliable and should last at least 10 years, probably longer. They are waterproof and fade proof. Many garden centers use this material for the labels in their nurseries. There is a place on the sign for both your box numbers as well as the location of the trail. The signs are printed 2 signs per sheet. You will need to cut them apart

To install - use a heavy duty staple gun with Stainless Steel Staples! I have been told that Stainless Steel also rusts, so VBS recommends MONEL Rustproof Staples.

Please make your checks payable to VBS, the Virginia Bluebird Society, and send them to VBS, 726 William St, Fredericksburg, VA 22401. Any questions please contact Anne Little at 540 373-4594.
